

# Any cloud environment. Any platform. Anywhere.

## Cloud Platform Services

Host your applications on the right cloud platform. We foster innovation with tailored environments that are designed to comply with industry and regional regulations while supporting your business use cases.

### The best platforms for your business

Cloud platforms can provide customizable, compliant and scalable environments that support business innovation and operational efficiency. However, they require careful management and the right data-sovereignty expertise for you to overcome challenges such as complexity, cost management, security and compliance.

NTT DATA's Cloud Platform Services are designed to host applications on the most suitable platforms, using the right technology, and are custom-fit to your specific business needs. Our solutions are delivered on single or over multi-platform environments with ease, helping you fully realize the value of your cloud investments. These services facilitate innovation, improve time to market and ensure compliance with industry and regional regulations.

### Getting the most from ready-made cloud environments

By utilizing predesigned, compliant environments that suit your business, you can maximize your digital potential and improve business efficiency and adaptability.

#### NTT DATA's Cloud Platform Services can help you with:

- **Integration and management:** We have the expertise to integrate and manage cloud platforms in a way that reduces complexity and avoids inefficiencies and potential disruptions.
- **GenAI and Cloud:** Our consultants can help you realize your business objectives and desired outcomes, leveraging GenAI models. Clients experience GenAI capabilities from within our discovery framework and process as well as from our Site Reliability Engineering (SRE), FinOps and DevOps capabilities. With GenAI services delivered over our cloud platforms, clients experience faster delivery, reduced risk and higher performing clouds.

- **Costs:** We work with you to understand, monitor and optimize cloud spending across different cloud services, such as data transfer and computing resources.
- **Security:** Complex private clouds can pose security risks. We implement robust security measures and continuously monitor your environment to protect against threats.
- **Compliance:** As a global, trusted IT partner, we have the legal knowledge and industry expertise to keep up with the changing regulations that affect all IT environments.
- **Technical expertise:** We have the specialized knowledge, industry insights and expertise to deploy and manage cloud platform services that support business outcomes.

Any cloud environment. Any platform.

## Your cloud platform for innovation and efficiency

As your partner, we consult with you to understand your organization, your goals and your priorities. From there, we assess which cloud platforms will best support what you want to achieve.

Leveraging our full-stack cloud expertise, deep strategic relationships with the world's top hyperscalers, and extensive knowledge of your business and industry, we help you get maximum value from your existing cloud environment in several areas.

### Compliance

Maintain data integrity and security and comply with the standards, regulations and legislation that apply to your organization and industry.

### Data sovereignty

Secure sensitive information in every region where you operate.

### Flexibility and scalability

Through public cloud, you have a shared-resource environment that can easily grow or shrink, allowing you to adjust your resource use as needed without significant upfront investments.

### Enhanced privacy and security

With private cloud, you have a secure and scalable cloud environment that is exclusive to your organization.

### Efficiency and innovation

Container platforms enable you to deploy applications efficiently across different environments, supporting innovation and improving your time to market for new features or products.

## How we can help you

From cloud-native platform containerization to continuous support and management across any public, private cloud or hybrid environment, our Cloud Platform Services enable your business outcomes.

### Industry Cloud Services

Our customized solutions for cloud infrastructure, platforms and software boost efficiency while meeting the regulatory and technological requirements of different industry sectors.

### Sovereign Cloud Services

We adjust how technologies and operations generate, process and store data to comply with stringent regional requirements for data sovereignty.

### Public Cloud Services

We design, implement and manage public-cloud environments, offering compliance, scalability, customization and a technology-neutral approach for efficient transformation.

### Private Cloud Services

Enhance your operations with private cloud, ensuring security, scalability and customization while meeting compliance and regulatory standards.

### Container Services

Streamline operations with containers and orchestration technology, from basic setups to fully managed solutions that are scalable and aligned with cloud best practices.

## Why NTT DATA?

- We are a Microsoft Global Systems Integrator Partner, the highest partner designation.
- NTT DATA has 19,000+ cloud infrastructure consultants
- Our Adaptive Cloud to Edge Platform reduces deployment times by 82% and resolves 95%+ of issues before they need escalation or cause an outage.
